

AutoEntry

14 day free trial.

From £9 per month (pricing is based on credits; starting price is for 50 credits).

AutoEntry is an invoice scanning software. Launched in 2016 by an Ireland-based team, **AutoEntry** automates data entry, analysis and document storage of all of your bills, receipts, sales invoices, and bank and card statements. Taken over by Sage in 2019, it is an award-winning product and one of the very few that has a statement reconciliation functionality.

AutoEntry is cloud-based, with a simple mobile app, and key features include flexible document capture, expenses folder, full line detail extraction, and purchase order matching. It is suitable for all sizes of businesses.

It integrates with all of the major, and many of the minor, accounting software programmes, including Sage Line 50c - the desktop-based version of the software.

AutoEntry has flexible, pay-as-you-use pricing plans, so you only pay for the features that you use. These are based on a credits system and start at £9 for 50 credits. Unused credits are rolled forward each month, making this an affordable solution for smaller businesses.

Johnston Carmichael use **AutoEntry** internally for our bookkeeping and we have found it to be the most accurate of the systems, although there is very little between **AutoEntry** and Receipt Bank, a similar system noted below.

Dext Capture

14 day free trial.

From £10 per month (single user -£10/mth for 50 items; multi-user - from £20/mth).

Founded in 2010, **Dext Capture** is another cloud-based invoice scanning solution. It includes many of the same features as AutoEntry, including the ability to integrate with Dropbox to automatically pick up and process items saved there - this is particularly useful if you want to allow multiple employees to save invoices to a centralised location, without needing to give them access to the software.

Integrating with all the major accounting software providers, including Sage Desktop, **Dext Capture** has a great user interface that is simple to navigate and use. The mobile app is very comprehensive, allowing most of the web-functionality to be commanded from the mobile app.

Pricing plans start at a flat fee of £10 for a single user and 50 items, and increase to a £40 per month fee for 20 users and 3,000 items.

Although **Dext Capture** and the other systems all operate in a similar fashion and are very simple to use, overall our view is that Receipt Bank (and in particular its mobile application) is the most user-friendly.

7 day free trial.

From \$20 per month (from March 2020, HubDoc is free with a Xero Subscription).

A Canadian based business, founded in 2007, **HubDoc** is Xero's own cloudbased invoice scanning solution having purchased the company in 2017. It has all of the features that you would expect, including a very intuitive filing system for storing the invoices, and can be linked to external storage systems to automatically store duplicate copies of supplier invoices.

Integrating with all the major accounting software providers, excluding Sage Desktop, **HubDoc** has a simple user interface that is straightforward to navigate and use.

Pricing for those without a Xero Subscription (where it is a free add-on) is \$20 per month for unlimited use.

Of the three "best of breed", **HubDoc** is definitely the most junior. It has a couple of useful features, but we have found it falling short in data extraction accuracy. Xero will, over the coming periods, be investing in the system to make it competitive with the rest of the market.

Bill automation: comparison of apps

This matrix will help you compare bill automation apps that integrate with your cloud-based system so you can make the right choice.
